(54) PORTABLE TELEPHONE WITH CRIME-PREVENTION FUNCTION

(57)Abstract:

PROBLEM TO BE SOLVED: To protect one's body from a crime and danger without requiring carriage of a private crime-prevention alarm by adding a crime-prevention alarm function to a portable telephone set.

SOLUTION: The hand strap 20 of the portable telephone set is restrained to a movable anchor member 22 mounted to a case. The base part 28 of the member 22 is, for example, circular, and is provided with an annular conductor 38 forming the movable contact point of a crime-prevention alarm operation switch. A pair of fixed contact points cooperating with the conductor 38 are provided inside of a case and these fixed contact points are connected to a prescribed circuit by wiring. Then the movable contact point and the fixed contact points constitute the crime-prevention alarm operation switch. In this telephone set, the member 22 of the strap 20 is normally held at a prescribed position by snap-fitting a projection to a semi-spherical recess. At the time of emergency, the switch is closed at the time of pulling the strap 20 and the crime-prevention alarm consisting of a buzzer rings.
